

## Michigan State University

# CANCER RESEARCH

Michigan State University has been advancing the **common good** with **uncommon will** for more than 160 years. One of the top research universities in the world, MSU pushes the boundaries of discovery and forges enduring partnerships to solve the most pressing global challenges.

**Our mission is to foster the next generation of innovative cancer researchers through foundational knowledge, high-quality research experiences, and multidisciplinary training.**

- > **100+** cancer faculty spanning **8** colleges and **23** departments
- > Active clinical trials in **8** different cancer types
- > **5** main research focus areas: cancer biology, cancer genetics, cancer imaging, experimental therapeutics, and cancer control
- > Faculty research projects investigating over **20** cancer types
- > Degree programs and more information available at: <https://cancer.msu.edu>

### DID YOU KNOW...?

MSU researchers made the ground-breaking discoveries leading to cisplatin as a cancer therapy. The use of cisplatin, when combined with early detection, has resulted in a cure rate of over 90% for testicular cancer patients.
